

1. Factorial de un numero:

```
package numfactorial;

import java.util.Scanner;

public class numfactorial {

    public static void main(String[] args) {

        Scanner teclado = new Scanner (System.in);

        System.out.println("Ingresa el numero de interes:");

        Int n = teclado.nextInt();

        Int factorial = 1;

        for (int i = 1; i <= n; i ++){

            factorial = factorial * i

        }

        System.out.println("El factorial de: “+ n +” es: " + factorial);

    }

}
```
